CertFIRE 2.0

Frontend API Reference — For Emarin Anna Tushar

1. Environment Variables (.env)

Add these to your .env file (frontend only — do NOT use service role key on frontend):

NEXT_PUBLIC_SUPABASE_URL	https://jpeebebfeslgdbqjndjk.supabase.co
NEXT_PUBLIC_SUPABASE_ANON_KEY	eyJhbGci... (anon/publishable key from Supabase)
NEXTAUTH_URL	http://localhost:3000
NEXTAUTH_SECRET	3fe5fd3c30fddb550e5e5be909c3eaed84c9aeb014742a925390f662c18095b4
NEXT_PUBLIC_APP_URL	http://localhost:3000

2. Auth APIs

Endpoint	Method	Body / Params	Description
/api/register	POST	{ name, email, password, role }	Create new account. role: PARTICIPANT or ORGANIZER
/api/auth/signin	POST	{ email, password }	Use signIn('credentials', {email, password}) from next-auth/react
/api/auth/signout	POST	—	Use signOut() from next-auth/react

3. Public APIs (No Auth Required)

Endpoint	Method	Body / Params	Description
/api/fests	GET	?search=xxx&category;=xxx	Fetch all fests. Supports search and category filter
/api/fests/[id]	GET	—	Fetch single fest details by ID
/api/verify/[certId]	GET	—	Verify certificate. Returns participant name, fest, issue date. 404 if invalid, 410 if revoked

4. Participant APIs (Role: PARTICIPANT)

Endpoint	Method	Body / Params	Description
/api/registrations	POST	{ userId, festId }	Register logged-in participant for a fest
/api/registrations	GET	—	Fetch own registrations with fest + certificate details
/api/profile	GET	—	Fetch own profile (id, name, email, role, createdAt)
/api/profile	PATCH	{ name?, email? }	Update own profile name or email
/api/profile/reset-password	POST	{ currentPassword, newPassword }	Change password. newPassword must be 8+ characters

5. Organiser APIs (Role: ORGANIZER)

Endpoint	Method	Body / Params	Description
/api/organiser/fests	GET	—	Fetch organiser's own fests with registration counts
/api/fests	POST	{ title, description, date, category }	Create a new fest
/api/fests/[id]	PATCH	{ title?, description?, date?, category? }	Update fest details
/api/templates	POST	form-data: file, festId, name	Upload certificate template to Supabase Storage
/api/templates	GET	?festId=xxx	Fetch templates for a fest
/api/bulk-register	POST	form-data: file (Excel), festId	Bulk register participants from Excel sheet
/api/certificates/generate	POST	{ festId, templateUrl? }	Generate PDF certificates for all approved registrations
/api/certificates/email	POST	{ festId }	Email certificates to all approved participants

6. Admin APIs (Role: ADMIN)

Endpoint	Method	Body / Params	Description
/api/admin/registrations	GET	—	Fetch all registrations with user and fest details
/api/admin/registrations	PATCH	{ registrationId, status }	Approve/deny registration. status: APPROVED, DENIED, PENDING
/api/certificates/revoke	POST	{ certId }	Revoke a certificate (admin only)
/api/admin/audit-logs	GET	—	Fetch last 100 admin actions with user details

7. Code Examples

Get session & user in a component:

```
"use client";
import { useSession } from "next-auth/react";
const { data: session } = useSession();
const user = session?.user as any;
// Access: user.name, user.email, user.role, user.id
```

GET request example:

```
const res = await fetch("/api/fests");
const data = await res.json();
```

POST request example:

```
const res = await fetch("/api/registrations", {
method: "POST",
```

```
headers: { "Content-Type": "application/json" },
body: JSON.stringify({ userId: user.id, festId: "xxx" }),
});
const data = await res.json();
```

File upload example (template/Excel):

```
const formData = new FormData();
formData.append("file", selectedFile);
formData.append("festId", festId);
formData.append("name", templateName);
const res = await fetch("/api/templates", { method: "POST", body: formData });
```

Protect pages by role:

```
"use client";
import { useSession } from "next-auth/react";
import { useRouter } from "next/navigation";
import { useEffect } from "react";
const { data: session } = useSession();
const user = session?.user as any;
useEffect(() => {
if (session === null) router.push("/login");
if (user?.role === "PARTICIPANT") router.push("/dashboard");
}, [session]);
```

8. Test Accounts

Role	Email	Password
ORGANIZER	organizer@certfire.com	password123
PARTICIPANT	test@example.com	test1234
